

Volunteer Engagement Bid Sheet

Project OAR Security Analysis	
Project Description	After a recent incident, client has significant security concerns. While steps have been taken to address the immediate issue, we'd like to do a high-level assessment of other vulnerabilities and then develop and manage a remediation plan. Client runs an on-premise Windows Server running an Access database with client information that is accessed both internally and remotely.
Task	Review current security practices, recommend and implement upgrades as needed
Task Description	Help make security systems better at OAR by analyzing OAR's current security practices and recommending and implementing improvements for system defenses and data loss prevention
Requested Timeframe	Now - March
Estimate	15-20 hours
Skills Needed	IT Security
Skill Level Requested	Intermediate
