	Project Office 365 & Azure migration						
	Project Description Microsoft Office 365 and Azure are cloud-based services that are widely used by several of IT4Cause's clients because of steep discounts for nonprofits. We need your help to configure, test, deploy, and manage Office 365 and Azure at different client sites.						
	Task Work with a team to help migrate current servers to Office 365 & Azure. Set up and manage user accounts, email, and other services.						
	Task Description Analyze current client server configuration and workloads to determine and implement best migration path to cloud-hosted Microsoft solutions.						
	Requested Timeframe March - May						
	Estimate 10 - 20 hours						
	Skills Needed		Office 365 Admin	Windows Server Admin			
	Skill Level Requested		Intermediate	Intermediate
