

IT4causes

IMPACT REPORT 2018

At IT4Causes, now in our fifth year of operations, we're strengthening our community by *helping many purpose-driven nonprofits* that work in areas ranging from the arts to behavioral health, early childhood education, veteran's assistance, support for vulnerable children and families, affordable housing and many more.

Nonprofit organizations have to be able to efficiently and securely manage the information that's critical to their mission. Too often, small- and mid-sized nonprofit organizations have outdated technology that limits their capacity to serve community needs.

IT4Causes provides low-cost solutions that ensure the *efficient flow of information* and allow staff to harness and use data to *improve operations* and have a *greater impact* on the lives of their clients for years to come.

Watch our video about our impact on one nonprofit.

Technology Services

We provided comprehensive review of current technology and how it enables or hampers core business processes at 18 agencies in 2018. We used the info collected and our extensive knowledge of nonprofit IT to recommend projects to make 26 agencies more effective through improvements in:

- Networks
- Low-cost and free hardware and software
- Email/Office productivity
- Cloud services
- Data management
- Process automation
- Outcomes tracking
- Information security
- Telephones
- Fundraising
- Collaboration
- Websites & social media
- Collaboration
- Case Management
- Outcomes tracking

Skilled IT Volunteers

Over 140 IT professionals and other volunteers engaged with IT4Causes to help implement 160+ projects that improved day-to-day operations at our partner agencies, and helped them serve over 20,000 clients across the region more efficiently, with better support and services, for years to come.

Intern Program

In 2018 we partnered with local colleges & universities to give 19 mostly disadvantaged students with paid opportunities to learn real-world skills & network with our volunteers while building their skills & resumes while also making an impact in the local community.

Business Model

To ensure sustainability of our services, our client nonprofits pay nominal hourly rates for our staff while providing skilled volunteers and interns at no cost. This typically means nonprofits are getting 3-6 hours of service for every paid hour.

Impact of Donations

Your financial contributions reduce what agencies have to pay for our services & allow us to serve more clients. Our extensive use of interns & volunteers means that every dollar you give has about \$5 worth of impact at our nonprofit partners.
